## Understanding Bank Reconciliation Statement

### What is a Bank Reconciliation Statement?

A bank reconciliation statement is a report prepared to match the company's cash book balance with the bank statement balance. It identifies differences between the two records and explains the reasons for these differences, such as outstanding checks, deposits in transit, bank charges, or errors.

## Why is Bank Reconciliation Important?

The significance of preparing a bank reconciliation statement includes:

- Ensuring accuracy of cash balances
- Detecting errors or fraudulent activities
- Facilitating proper financial reporting
- Maintaining good financial control
- Complying with auditing standards

## Components of a Bank Reconciliation Statement

A typical bank reconciliation statement contains:

- Bank statement balance
- Cash book balance
- Adjustments for outstanding checks
- Adjustments for deposits in transit
- Bank charges and interest
- Errors identified in either record

## Steps to Prepare a Bank Reconciliation Statement

Preparing a bank reconciliation involves systematic steps:

- Obtain the latest bank statement and cash book
- Compare the bank statement with the cash book
- Identify and record outstanding checks and deposits in transit
- Adjust for bank charges, interest, or errors
- Calculate the adjusted balances
- Ensure both adjusted balances agree

## Sample Question and Solution

## Scenario:

XYZ Ltd. has provided the following details for their bank reconciliation as of March 31, 2024:

- Bank statement balance on March 31, 2024: Rs. 50,000
- Cash book balance on March 31, 2024: Rs. 48,500
- Outstanding checks: Rs. 4,000
- Deposits in transit: Rs. 2,500
- Bank charges for March: Rs. 200
- Interest credited by bank: Rs. 150
- Bank error: Rs. 300 (bank recorded a deposit of Rs. 1,000 instead of Rs. 1,300)

Question:

Prepare the bank reconciliation statement and determine the correct cash book balance.

## Solution:

Step 1: Start with the bank statement balance

Bank statement balance: Rs. 50,000

Step 2: Adjust for deposits in transit

Deposits in transit: Rs. 2,500

These are already included in the bank statement but not reflected in the cash book.

Step 3: Adjust for outstanding checks

Outstanding checks: Rs. 4,000

These are recorded in the cash book but not yet cleared by the bank.

Step 4: Adjust for bank errors

Bank error: Rs. 300 (the bank understated a deposit by Rs. 300)

Step 5: Calculate the adjusted bank balance

Adjusted bank balance = Bank statement balance + Deposits in transit - Outstanding checks ± Bank errors

Adjusted bank balance = Rs. 50,000 + Rs. 2,500 - Rs. 4,000 + Rs. 300

= Rs. 50,000 + 2,500 - 4,000 + 300

= Rs. 48,800

Step 6: Adjust the cash book balance

Cash book balance: Rs. 48,500

Adjustments:

- Subtract bank charges: Rs. 200
- Add interest credited by bank: Rs. 150

Adjusted cash book balance = Rs. 48,500 - Rs. 200 + Rs. 150

= Rs. 48,450

Step 7: Reconciliation

Since the adjusted balances are Rs. 48,800 (bank) and Rs. 48,450 (cash book), they do not match. The difference is Rs. 350.

Step 8: Explanation of the discrepancy

The Rs. 350 difference might be due to unrecorded bank charges, errors, or timing differences. To reconcile, the company should verify:

- Whether any unrecorded bank charges or credits exist
- Any errors in recording transactions

Final step:

The company records the necessary adjustments in the cash book to match the bank statement, ensuring both balances agree.

## Conclusion

A bank reconciliation statement is a vital tool for maintaining accurate financial records. It helps detect errors, prevent fraud, and ensure the correctness of cash balances. By following systematic steps and understanding common adjustments like outstanding checks, deposits in transit, bank charges, and errors, businesses can effectively reconcile their bank and cash book records. Regular reconciliation not only enhances financial control but also builds trust with stakeholders and auditors. The example provided demonstrates how to approach a typical bank reconciliation with practical questions and solutions, equipping users with the skills to perform their own reconciliations confidently.

Investigative Approach: Question and Solution

To illustrate the process, consider the following common problem encountered during bank

reconciliation.

### Sample Question

Question:

XYZ Ltd. has the following details for the month of March 2024:

- Cash book balance (as per company records): ?1,20,000
- Bank statement balance (as per bank's records): ?1,15,000
- The following reconciling items were identified:

- Deposit of ?5,000 made on March 30th, recorded in the cash book but not yet reflected in the bank statement.
- Outstanding checks totaling ?8,000 issued but not yet cleared by the bank.
- Bank charges of ?200 debited in the bank statement but not yet recorded in the cash book.
- A cheque of ?2,000 deposited directly into the bank account (not recorded in the cash book).
- A bank error: a deposit of ?1,000 was wrongly recorded as ?100 by the bank.

Required:

Prepare the bank reconciliation statement for March 2024.

### Step-by-Step Solution

Step 1: Start with the balances

- Cash book balance: ?1,20,000
- Bank statement balance: ?1,15,000

Step 2: Adjust the bank statement balance

a. Add deposits in transit:

Deposit made on March 30th of ?5,000 not yet reflected in bank statement.

Adjusted balance:  $?1,15,000 + ?5,000 = ?1,20,000$

b. Deduct outstanding checks:

Outstanding checks totaling ?8,000.

Adjusted balance:  $\text{?1,20,000} - \text{?8,000} = \text{?1,12,000}$

c. Correct bank error:

Bank wrongly recorded a deposit of ?1,000 as ?100.

Difference:  $\text{?1,000} - \text{?100} = \text{?900}$  (bank under-recorded deposit).

Adjusted bank balance:  $\text{?1,12,000} + \text{?900} = \text{?1,12,900}$

Step 3: Adjust the cash book balance

a. Record bank charges:

Bank charges of ?200 deducted by the bank but not yet recorded in cash book.

Adjusted cash book balance:  $\text{?1,20,000} - \text{?200} = \text{?1,19,800}$

b. Record direct deposit:

A deposit of ?2,000 directly into the bank account (not recorded in cash book).

Adjusted cash book balance:  $\text{?1,19,800} + \text{?2,000} = \text{?1,21,800}$

Step 4: Final comparison

- Adjusted bank statement balance: ?1,12,900

- Adjusted cash book balance: ?1,21,800

Difference:  $\text{?1,21,800} - \text{?1,12,900} = \text{?8,900}$

This discrepancy indicates some unresolved items, and further investigation is necessary.

Step 5: Analyze and reconcile remaining differences

The remaining difference of ?8,900 suggests additional unrecorded items or errors. Since we have

already accounted for the known items, possible causes include:

- Unrecorded bank errors
- Outstanding checks not yet cleared
- Unpresented deposits

Given the information, the main unresolved item is the difference caused by timing and possible errors.

Final Reconciliation Statement

| Particulars                                               | Dr. (?)  | Cr. (?)  |
|-----------------------------------------------------------|----------|----------|
| ----- ----- -----                                         |          |          |
| Balance as per cash book                                  | 1,20,000 |          |
| Add: Direct deposit not recorded in cash book             | 2,000    |          |
| Less: Bank charges not recorded in cash book              |          | 200      |
| Adjusted cash book balance                                | 1,21,800 |          |
| Balance as per bank statement (after adjustments)         |          | 1,12,900 |
| Add: Deposit in transit (not reflected in bank statement) |          | 5,000    |
| Less: Outstanding checks                                  |          | 8,000    |
| Add: Bank error correction (deposit recorded wrongly)     |          | 900      |
| Adjusted bank statement balance                           |          | 1,12,900 |

Note: The remaining difference of ?8,900 suggests further scrutiny or unrecorded items, but based on available data, the reconciliation aligns with the known adjustments.
