- Select parts of the mesh and use tools like *Extrude* (E) to extend geometry
- Apply *Loop Cuts* (Ctrl + R) to add additional geometry for more detail

Using Modifiers for Non-Destructive Editing

Modifiers are powerful tools that allow you to alter models without permanently changing the base geometry.

- Examples include *Subdivision Surface* for smoothing, *Mirror* for symmetrical modeling, and *Boolean* for combining objects
- Apply modifiers once you're satisfied, or keep them editable for future adjustments

Adding Materials and Textures

Realistic or stylized visuals rely heavily on materials and textures.

Creating Basic Materials

- Select your object
- Go to the **Material Properties** tab in the Properties Panel
- Click *New* to create a new material
- Adjust properties like *Base Color*, *Metallic*, *Roughness*

Applying Textures

- Switch to the **Shading Workspace** for node-based material editing
- Add an *Image Texture* node and connect it to the Base Color input
- Select your texture image file
- Use UV Unwrapping (Tab into Edit Mode, select all with A, then U > Unwrap) for accurate placement

Lighting and Rendering Techniques

Proper lighting enhances the realism and mood of your scene.

Adding Lights

- Press **Shift + A** and choose *Light*
- Select from point, sun, spot, or area lights depending on your scene needs
- Adjust light properties such as intensity, color, and position in the Properties Panel

Rendering Your Scene

Blender offers multiple rendering engines; Cycles and Eevee are the most popular.

- Set your preferred engine in the **Render Properties** tab
- Configure output settings like resolution and file format
- Press **F12** to render your scene
- Save your rendered image from the Image menu (Image > Save As)

Animating in Blender

Animation brings your models to life through keyframes and timeline controls.

Basic Animation Workflow

- Select the object you want to animate
- Move to the desired frame in the Timeline
- Press **I** to insert a keyframe for properties like Location, Rotation, or Scale
- Advance to another frame and modify the object
- Insert another keyframe
